

---

Welcome back!

After a busy week of sales, we're onto our next blog. This week, we want to share some how-to tips, from our side to yours. Read on to build your knowledge, and possibly learn something new!

---

## HOW TO: Make the most of your thrifting experience!

---

Thrifting is more than just buying second-hand. One of our motto's we like to stick to is 'Love the Hunt, Enjoy the Find'.

---

1. Allow yourself plenty of time. Thrifting can be overwhelming, with so many racks you just don't know where to start. Going in stress free and with a clear head will increase your chances of striking gold. Although tedious at times, many of the great finds are in the places people tend to skip. Look at as much as you can, and keep an open mind.
2. When looking through clothes, many people take one quick look and keep on moving. BE OPENMINDED!. Rack blindness is real, be confident in your ability to style an item. If an item catches your eye, pop it in the basket, and take it to the change rooms. Sometimes you just have to trust the process and try it on. And if you see potential, but it's not quite right? ALTER IT! Unique pieces only enhance your style, and on top of that, it makes a great hobby!
3. If you can, learn some basic altering! This includes hemming, cropping, taking in the waists etc. You might find a piece one day, but it's a bit too baggy, a couple sizes too big. Instead of saying goodbye, you can alter the piece to fit you and your individual figure. Altering can transform an item from a cheap donated piece to a brand new style.

---

That's all for this week :)

We hope you can take these tips and use them to your advantage!
